

CPS 643 Final Project

User Manual

Strike

500966762 - Tyler Quach

Hardware Requirements:

- Computer
- VR headset

Software Requirements:

- Unity (made on version 2022.3.18f1)
- Unity Hub

Libraries/External assets

- [Steam VR plugin](#)
- [Baseball](#)
- [Metal Bat](#)

How to Setup:

- Download Zip of Unity Project
- Unzip Project into any folder
- On Unity Hub Go to Projects page
- Press Add
 - Find project folder and add it to unity projects page
- Launch project
 - With head set plugged in and ready press the play button in the unity editor

How To Play:

- After finalizing settings in the options menu
- Press play on the main menu
- Inorder to begin the pitchers sequence the batter must be in a ready position
 - Grabbing the bat above the primary hand with the off hand will assume the ready position
 - You can tell that the pitcher will throw based on the green indicator of the pitching machine
- There will be a secret timer before the pitch is thrown
 - Once the pitch is thrown there will be a red indicator on the pitching machine signifying that its is on cooldown/waiting for game sequence (wiether there is a strike, ball, foul)
- This game will loop through this pitchers sequence

Controls:

- Main hand trigger to select menu buttons
- Off hand grip to grip the bat to commence batting ready position
